

ATTENTION ALL BUSINESSES!

If **you** are thinking of investing in a telephone system in the next 12 months – Here's an offer you'd be crazy to ignore...

If you purchase a **Mitel 3300 IP Telephone System** between the **1st April and 30th June** we will offer you at least **£1,000 cash back** for your old system maybe even more...

[Click here](#) to understand the benefits of an IP telephone system.

PLUS you will get

- ✓ **FREE** Training
- ✓ **FREE** 1st Year's maintenance
- ✓ **FREE** Project Management
- ✓ **1/2 Price** Installation

Saving at least an additional **£1,125**

To obtain your free quotation and buy-back valuation **phone us on 0800 7837107 or request via our website www.boucon.com/quotation** but **HURRY** – you must place your order before the end of June and the sooner you place it, the more you save.

The first quarter is typically quiet for many enterprises. This is true of our business and presents an opportunity that I think you may be able to take advantage of.

You see, we have a number of highly trained and experienced engineers, who for the first time in ages will have some spare time during our first quarter. As you will be well aware unutilised engineers does not make good business sense and so here's an idea that could help us both.....

If you help keep our engineers fully occupied by placing your order in the first quarter (rather than waiting until later in the year) we are happy to make less margin but still cover our costs, and will be able to offer you a package that will save you at least £2,125. The earlier you purchase, the more you save, for example if you order in April we will offer you £1,200 on your current system, May £1,100 and June £1,000.

Take advantage of this one-off opportunity to install a state-of-the-art IP System for less money than the list price of a small business telephone system.

Take a look at this example:- A typical small business telephone system including support for 4 x ISDN2 channels, 6 digital display phones, 4 analogue phones, Voicemail, Training, Installation and first years maintenance would cost in the region of £2,888.00

The same configuration on a Mitel 3300 IP Solution utilising the innovative 5212 IP phones in place of the digital sets would normally cost £4,866.00 but Boucon have slashed the price to offer you this package for just £2,541.00 in April, £2,641 in May and £2,741 in June - **LESS THAN A BASIC SMALL BUSINESS TELEPHONE SYSTEM.**

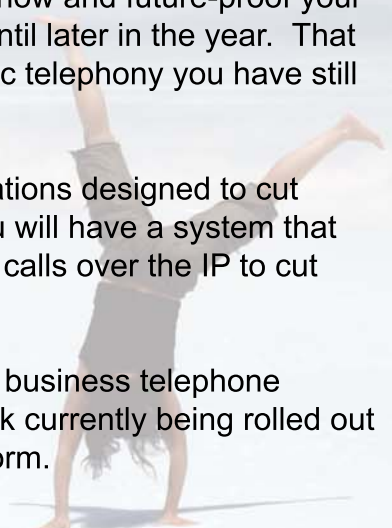

Be certain you've got the right system for your needs before you pay us a penny -

All our customers benefit from the 'Boucon Guarantee' - offering you a one month trial of our recommended solution, with absolutely no outlay, commitment or risk on your part whatsoever. For more information on the Boucon Guarantee please visit www.boucon.com (or click here depending on whether it is on web or letter).

Communications is evolving at such a pace that it is almost impossible for any business to understand what technologies will offer them benefit in the future. So why not pay less now and future-proof your investment, just by deciding to buy in the first quarter rather than delaying until later in the year. That way you leave all your options open, and if you want to continue to use basic telephony you have still got yourself a very good deal.

But if at some point in the future you decide that one of the IP based applications designed to cut business costs and improve efficiencies can offer your business benefit, you will have a system that can support it. Such applications include home or remote working, sending calls over the IP to cut costs, Screen popping, mobile twinning, integration with Outlook etc

Another very good reason to seriously consider this offer is that some small business telephone systems may not even be equipped to connect to BT's 21st Century Network currently being rolled out across the UK. IP Communications is fast becoming a necessity and the norm.

If you don't take advantage of this offer now and instead opt for a more basic phone system, you could find that you are forced to change it again much sooner than you had planned or budgeted for.

Take advantage of these huge savings – but HURRY – you must place your order before the end of June and the sooner you place it, the more you save.

If you are interested in finding out how you can save a minimum of £2,125 on your telecoms requirements this year, simply call 0800 7837107 now to arrange for one of our specialists to visit and listen to your requirements. You will then receive a report outlining how much you can save on your system specification, along with confirmation of the 'Boucon Guarantee' offer.

A limited amount of funds are available to support this offer and meetings will be arranged on a first come first served basis. So if you are interested don't delay and miss out on the opportunity to get up to £1,200 back for your old system.
